

This bulletin has been issued to provide useful service and directory information related to the business of Electrical Inspection performed by Nova Scotia Power.

The Electrical Inspection services provided are made available through a Wiring Permit Center and Wiring Inspectors working from regional field offices across the province.

The permit center office is open for business between the hours of 7:00 am and 6:00 pm, Monday through Friday with the exception of holidays and weekends.

Wiring Permits:

Electrical Contractors may contact a permit associate at our Wiring Permit Center to obtain any of the following business services:

- Change mailing address.
- Establish a billing account for Wiring Permits.
- Inquire about account balance.
- Inquire about job status.
- Inquire about over-charged bills for Wiring Permits.
- Report certificate or license renewal.
- Request and schedule Wiring Inspection.
- Request for Wiring Permit.
- Request information related to the schedule of fees.

Billing:

Wiring Permit billing account statements are issued in the mail on a monthly basis. Bill payments may be made at any payment agent across the province by cash, cheque, money order, Interac debit, or directly debited from bank account through an automatic payment plan.

Wiring Inspection Technical Matters:

Electrical Contractors are expected to contact a local Wiring Inspector servicing the applicable Inspection Area to obtain the following information services related to inquiries of a technical nature that are general or that pertain to a particular job:

- Interpretation and compliance requirements of the Canadian Electrical Code and the NS Power Electrical Inspection Bulletins.
- Electrical drawings and specifications.
- Approved equipment (certified or field evaluated).

When deemed necessary, a Wiring Inspector shall consult with the NS Power Chief Electrical Inspector, regarding technical matters which may require clarification to Code or Bulletin interpretation, and also regarding situations which will require dispute resolution.

After first contact has been established by an Electrical Contractor with a Wiring Inspector on such technical matters, the contractor may further discuss the concern with the NS Power Chief Electrical Inspector.
