

NON-CONFIDENTIAL

1 **Request IR-15:**

2
3 **Please provide an electronic download of the streetlight portion of NSPI's asset**
4 **management system as of December 31, 2011, or a more recent date, as such data is**
5 **available. Please provide this data in Excel or compatible format with identified column**
6 **headings and explanation of each heading where codes are used.**

7
8 **a.) Does the spreadsheet provided detail all of the data in NSPI's asset management**
9 **records for street lighting?**

10
11 **b.) Is the asset management system for street lights broken down into retirement units?**

12
13 **c.) Does NSPI maintain quantities and types of fixtures in its asset management**
14 **system? If the spreadsheet is not a complete representation of the asset management system**
15 **for street lights, please also provide the missing data pertaining to type, quantity and**
16 **associated vintage.**

17
18 **d.) What procedure does NSPI use when it retires a street light? For example, does it go**
19 **to its property records or asset management system and locate the particular street light by**
20 **type, year of installation and original cost per unit? If yes, where is this information shown**
21 **in the spreadsheet? If no, how does NSPI know with any degree of accuracy what dollar**
22 **amount to retire? What procedure is used? Does NSPI utilize more than one database for**
23 **the purpose of determining what amount to retire, e.g., the asset management system and**
24 **another list of property for street lights? If so, how are they related? How are the costs and**
25 **quantities correlated and reconciled?**

NON-CONFIDENTIAL

1 Response IR-15:

2

3 Please refer to Attachment 1, filed electronically, for the detailed listing of the streetlight portion
4 of NS Power's asset management system.

5

6 (a) Yes.

7

8 (b) The asset management system for streetlights is not broken down into retirement units.

9

10 (c) NS Power does not maintain quantities or types of fixtures in its asset management
11 system.

12

13 (d) Please refer to HRM IR-20.

NON-CONFIDENTIAL

1 **Request IR-16:**

2
3 **With regard to the street lighting account in NSPI's asset management system:**

4
5 **a.) What, if any, categories are the costs broken down among?**

6
7 **b.) Are crosswalk and/or directive lighting fixtures and/or associated equipment**
8 **included in this account? If yes, please provide the balance and the as-of date.**

9
10 **c.) Are there, e.g., incandescent and fluorescent fixtures, in the street lighting account**
11 **that will not be targeted for conversion to LED? If yes, please provide quantities and**
12 **balances for each at the as-of date.**

13
14 **d.) What types of plant, other than overhead street lights and crosswalk and directive**
15 **lighting are included in the street lighting account? Please provide the balance, by**
16 **category, and the as-of date.**

17
18 **Response IR-16:**

19
20 **(a) Please refer to HRM IR-15. NS Power does not break down streetlights into further**
21 **categories in its capital asset management system.**

22
23 **(b) Yes. The capital asset management system does not track this level of detail.**

24
25 **(c-d) Please refer to HRM IR-17. NS Power does not have a breakdown of assets at this level.**

NON-CONFIDENTIAL

1 **Request IR-17:**

2

3 **Is it NSPI assertion that the street lighting account only contains non-LED street lighting**
4 **fixtures, such that at the end of the non-LED to LED conversion period, the street lighting**
5 **account will be zero? If not, please explain.**

6

7 Response IR-17:

8

9 No. The streetlight account includes streetlights as well as other types of lighting such as
10 crosswalks, traffic lights, parking lots, trailer parks, ball fields, and playgrounds.

NON-CONFIDENTIAL

1 **Request IR-18:**

2

3 **Where in NSPI's books will the new LED fixtures be booked? Will a new account or sub-**
4 **account be created?**

5

6 Response IR-18:

7

8 A new activity code and corresponding depreciation group will be created for LED streetlights.

NON-CONFIDENTIAL

1 **Request IR-19:**

2

3 **If during the non-LED to LED conversion process, reusable components such as brackets**
4 **and wire stay in service, will these components remain in the street lighting account or be**
5 **transferred to the same ‘account’ as the new LED fixtures?**

6

7 Response IR-19:

8

9 For customers that chose to own their own fixtures, the reusable components will no longer be
10 included in the assets of NS Power.

11

12 For customers that chose to continue to rent their fixtures from NS Power, the reusable
13 components will reduce the cost of the new asset. Customers will pay for the undepreciated
14 value of the non-LED assets but will not incur costs of new components if the existing can be re-
15 used.

NON-CONFIDENTIAL

1 **Request IR-20:**

2
3 **In response to HRM IR-42(h), in NSPI's 2012 GRA (NSUARB P-892) that requested**
4 **information on how NSPI determines the amount to be retired for its street lighting**
5 **fixtures, NSPI replied:**

6
7 **When NSPI retires a street light the estimated original cost is removed from the estimated**
8 **year of installation. The original cost estimate is determined by taking the installation cost**
9 **of the replacement street light and applying a discount factor to reflect the cost back to the**
10 **original year of installation.**

11
12 **a.) How is the estimated cost and estimated year of the street light calculated?**

13
14 **b.) From the above response, please confirm that NSPI tracks the date on each street**
15 **lighting fixture it retires.**

16
17 **c.) Please discuss how the discount factor is derived and a reference to any specific**
18 **publication, as applicable.**

19
20 **d.) Has NSPI ever changed the methodology to derive the discount factor in the course**
21 **of its history as a public utility? Please discuss each such change in detail.**

22
23 **e.) After all of the non-LED fixtures have been converted to LED, what plant if any,**
24 **other than LED fixtures, will remain in the street lighting account? Please provide**
25 **specifics including the current balance of such plant by type and balance for the most**
26 **recent as-of date.**

NON-CONFIDENTIAL

1 **f.) Please confirm that it is conceivable that after all non-LED street lights are retired**
2 **using the discounting procedure employed by NSPI in its response above, that there could**
3 **be a residual balance, positive or negative, in the street lighting account associated with**
4 **those non-LED street lights that were targeted for conversion to LED.**

5
6 **g.) If the response to the above question is affirmative, does NSPI anticipate simply not**
7 **ascertaining or inquiring into any difference that may exist? If not, please explain how**
8 **NSPI intends to identify and treat any difference? If the response to the above question is**
9 **No, please explain why.**

10
11 **h.) Please indicate whether the NSPI procedure described above is being used currently**
12 **as well as prospectively during the conversion process.**

13
14 **Referring to NSPI's response to 2013 GRA Multeese IR-22, Attachment 1, page 1 of 1, was**
15 **NSPI's procedure described above, used to develop, e.g., the figure of \$12,124,112 for**
16 **anticipated plant retirements in 2013?**

17
18 **How many years does NSPI anticipate the LED conversion to take?**

19 **Please indicate why the retirement level for 2013 (\$12.1-M) is high in relation to the**
20 **conversion period and the plant original cost. Considering the retirement duration.**

21
22 Response IR-20:

23
24 (a) The estimated cost is calculated as described in HRM IR-42(h) filed in the 2012 GRA.¹
25 That is, the replacement light's value is discounted back to the estimated age of the
26 original light. Field engineers' judgment is relied on to determine the age of the retired
27 lights.

¹ NSPI 2012 General Rate Application, NSPI(HRM) IR-42(h), NSUARB-NSPI-P-892, July 18, 2011.

NON-CONFIDENTIAL

- 1 (b) No. All retirements are tracked in NS Power's capital asset management system on the
2 date they are recorded in the system.
3
- 4 (c) The discount factor applied comes from the Bank of Canada Inflation Calculator.²
5
- 6 (d) Not to the knowledge of current staff.
7
- 8 (e) Please refer to HRM IR-17. NS Power does not have a breakdown of the value of assets
9 by type as this has been accounted for as an accounting pool.
10
- 11 (f) Yes, this is conceivable.
12
- 13 (g) NS Power is currently working through the details available to determine the number of
14 each asset type available in the customer information system and will propose an
15 objective method to determine an appropriate value. For example, the value of the asset
16 pool in dollars divided by the number of assets in the customer information system. The
17 value of the non-LED assets will continue to depreciate in the current asset pool once all
18 other lights have been converted.
19
- 20 (h) The retirement procedure described above is currently being used. If a municipality
21 choses to purchase its streetlights, they will be removed from the accounts at the net book
22 value (the municipality's purchase price). If the NS Power conversion plan being
23 discussed at present is approved, a separate mechanism will be used to collect the
24 remaining associated value.
25

² <http://www.bankofcanada.ca/rates/related/inflation-calculator>

NON-CONFIDENTIAL

- 1 (i) Yes, the same retirement procedures were used to determine the forecasted streetlight
2 retirements included in the Application and subsequently in the details provided in
3 Multese IR-22.
- 4 (j) Draft regulations allow seven years.
5
- 6 (k) The forecasted 2013 retirement amount also includes the value of the forecasted 2012
7 retirements. Please note that this forecast was prepared prior to the draft regulations and
8 the capital work order application will include up-to-date estimates.

NON-CONFIDENTIAL

1 **Request IR-21:**

2

3 **Please file and provide a copy of the 2006 Unmetered Class Cost of Service Review and**
4 **Street Lighting Study Report, and all other updates to present.**

5

6 Response IR-21:

7

SCHEDULE 8

**STREET / CROSSWALK LIGHTING STUDY
LAMP LIFE ANALYSIS
September 2005**

Assumptions: Total annual photocell operating time is based on 4,000 hours per year or 333 hours per month.
All Average Rated Life Spans are as indicated in the IES Lighting Handbook, 1981 Edition
(IES = Illuminating Engineering Society)

Lamp Type	Average Life (Hrs)	Burning Hours per Year	Service Life (Years)	Life Relative to 100W HPS	Replacements Relative to 100W HPS
Incandescent	2500	4000	0.6	0.10	9.60
Flourescent (48 in., T12, Recess Base)	12000	4000	3.0	0.50	2.00
Mercury Vapour	24000	4000	6.0	1.00	1.00
Mercury Vapour 125W *See Note	18000	4000	4.5	0.75	1.33
Metal Halide 175W	7500	4000	1.9	0.31	3.20
Metal Halide 250W	10000	4000	2.5	0.42	2.40
Metal Halide 400W	15000	4000	3.8	0.63	1.60
Metal Halide 1000W	10000	4000	2.5	0.42	2.40
High Pressure Sodium 70W	24000	4000	6.0	1.00	1.00
High Pressure Sodium 100W	24000	4000	6.0	1.00	1.00
Low Pressure Sodium	8000	4000	2.0	0.33	3.00

* No Average life data was available for this lamp size in the references listed above. 75% of the quoted life for all Mercury Lamps was used.

							1,097,173			2,591	(257,984)				
TOTALS							\$21,267,232			134,981	(\$310,200)		22,071.523	45.816	

Count = **81**

Note 1 - Red highlighted P&E charges relate to calculated rounding differences using Misc. Small Loads Tariff.
Note 2 - Incandescent rates were set at 250W and 400W Mercury Vapour

Calculation of Power & Energy Rate :				
Based on Misc. Small Loads Tariff Rate Components & 1kW lighting load				
<u>Photocell Operation (4000 burning hours per year)</u>				
Demand Charge \$ 8.43/kW (annual)				\$101.16
Energy Charge :				
1st Block : 1st 200 kW.h (annual)	2,400	0.0958		229.92
2nd Block : All additional (annual)	1,600	0.0634		<u>101.44</u>
				\$432.52
Rate per kW.h	4,000			<u>\$0.1081300</u>
<u>Continuous Burning (8760 burning hours per year)</u>				
Demand Charge \$ 8.43/kW (annual)				\$101.16
Energy Charge :				
1st Block : 1st 200 kW.h (annual)	2,400	0.0958		229.92
2nd Block : All additional (annual)	6,360	0.0634		<u>403.22</u>
				\$734.30
Rate per kW.h	8,760			<u>\$0.0838247</u>

2012 General Rate Application (NSUARB P-892)
NSPI Responses to Multeese Information Requests

NON-CONFIDENTIAL

1 **Request IR-37:**

2

3 **With respect to NSPI’s response to Multeese IR-2(a):**

4

5 **(a) Please provide a copy of the “parallel and independent unmetered pricing study”**
6 **referred to which resulted in the rates approved by the Board.**

7

8 **(b) If the study does not include the derivation of various street lighting rates, please**
9 **provide the derivation of pricing for Rate Codes 121, 221 and 321 as approved by**
10 **the Board in P-888.**

11

12 **Response IR-37:**

13

14 **(a–b) Please refer to Attachment 1.**

STREET / CROSSWALK LIGHTING STUDY

**Tax-Adjusted Weighted Average Cost of Capital
 For 2009 Street Light Rates**

a) Weighted Average Cost of Capital - Pretax

	Proportion	Cost	Extended
ST Debt	7.10%	6.17%	0.44%
LT Debt	46.40%	8.16%	3.79%
Preferred	9.00%	5.42%	0.49%
Common	37.50%	9.35%	3.51%
	100.00%		8.22%

WACC - pretax cost 8.22%

b) Additional income tax for common equity

Extended equity cost	3.51%
Effective tax rate (excluding surtax)	35.0%
Income tax	1.89%

WACC - equity tax cost 1.89%

c) Large Corporations Tax

Provincial capital tax (2009)	0.175%
Federal capital tax (2009)	0.000%
Ave. NBV - Street Lighting	\$25.914
Ave. NBV - Assigned GP Plt.	1.863
Ave. Deferred Chgs & W/C	<u>3.410</u>
NPV - Total Street Lighting	\$31.187

Provincial capital tax	\$0.055
Federal capital tax	\$0.000
Total	\$0.055
Percentage of NBV	0.18%

WACC - Large Corporations Tax 0.18%

d) Grants in Lieu of Property Tax

Total 2009 Forecasted Expense	\$34.800
St. Lgts. % of Total Electric Plant	1.17%
St. Lgts. Allocated Amount	\$0.406
Percentage of NBV	1.30%

WACC - Grants in Lieu of Property Tax 1.30%

Total WACC - Interest / Carrying Cost **11.59%**

**STREET / CROSSWALK LIGHTING STUDY
AREA LIGHTING MATERIAL COST ANALYSIS
June 2007**

Light Type Street Lights	Material Cost	Fixture	Lamp	Photocell	Davit	Wire	Connectors	Fasteners
Incandescent < 300 Watts	\$51.36	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	\$0.00

**STREET / CROSSWALK LIGHTING STUDY
LAMP LIFE ANALYSIS
September 2005**

Assumptions: Total annual photocell operating time is based on 4,000 hours per year or 333 hours per month.
All Average Rated Life Spans are as indicated in the IES Lighting Handbook, 1981 Edition
(IES = Illuminating Engineering Society)

Lamp Type	Average Life (Hrs)	Burning Hours per Year	Service Life (Years)	Life Relative to 100W HPS	Replacements Relative to 100W HPS
Incandescent	2500	4000	0.6	0.10	9.60
Flourescent (48 in., T12, Recess Base)	12000	4000	3.0	0.50	2.00
Mercury Vapour	24000	4000	6.0	1.00	1.00
Mercury Vapour 125W *See Note	18000	4000	4.5	0.75	1.33
Metal Halide 175W	7500	4000	1.9	0.31	3.20
Metal Halide 250W	10000	4000	2.5	0.42	2.40
Metal Halide 400W	15000	4000	3.8	0.63	1.60
Metal Halide 1000W	10000	4000	2.5	0.42	2.40
High Pressure Sodium 70W	24000	4000	6.0	1.00	1.00
High Pressure Sodium 100W	24000	4000	6.0	1.00	1.00
Low Pressure Sodium	8000	4000	2.0	0.33	3.00

* No Average life data was available for this lamp size in the references listed above. 75% of the quoted life for all Mercury Lamps was used.

Count = 83

Note 1 - Red highlighted P&E charges relate to calculated rounding differences using Misc. Small Loads Tariff.
Note 2 - Incandescent rates were set at 250W and 400W Mercury Vapour

Calculation of Power & Energy Rate :			
Based on Misc. Small Loads Tariff Rate Components & 1kW lighting load			
<u>Photocell Operation (4000 burning hours per year)</u>			
Demand Charge \$ 8.43/kW (annual)			\$102.06
Energy Charge :			
1st Block : 1st 200 kW.h (annual)	2,400	0.09665	231.96
2nd Block : All additional (annual)	1,600	0.06396	102.34
			\$436.36
Rate per kW.h	4,000		<u>\$0.1090891</u>
<u>Continuous Burning (8760 burning hours per year)</u>			
Demand Charge \$ 8.43/kW (annual)			\$102.06
Energy Charge :			
1st Block : 1st 200 kW.h (annual)	2,400	0.09665	231.96
2nd Block : All additional (annual)	6,360	0.06396	406.79
			\$740.81
Rate per kW.h	8,760		<u>\$0.0845669</u>

Revenue Summary by Rate Component

	Power & Energy	Maintenance	Capital	Total
<u>2009 Proposed Revenue (Using Actual Jan 2008 Inv. Level)</u>				
Current Rates	\$9,470,670	\$4,329,764	\$7,315,865	\$21,116,299
Proposed Rates	<u>9,704,758</u>	<u>4,892,737</u>	<u>7,811,878</u>	<u>22,409,373</u>
Variance	234,088	562,973	496,013	1,293,074
Add. Forecasted S/L Revenue using 2009 Load Forecast	<u>193,314</u>	<u>145,290</u>	<u>243,169</u>	<u>581,773</u>
Adjusted 2009 Prop. S/L Revenue	9,898,072	5,038,027	8,055,047	22,991,146
Prop. Misc. Lighting Revenue	2,160,872			2,160,872
Add. Forecasted Misc. Revenue using 2009 Load Forecast	42,830			42,830
Total Prop. Unmetered Rev.	\$12,101,774	\$5,038,027	\$8,055,047	\$25,194,848

NON-CONFIDENTIAL

1 **Request IR-22:**

2
3 **a.) Please provide an explanation of how and when NSPI is seeking NSUARB approval**
4 **of the capital expense for conversion to LED street lights.**

5
6 **b.) Considering that the NSUARB has placed street lighting stranded cost on the Issues**
7 **List for this hearing, is NSPI submitting any supplementary evidence or analysis to amend**
8 **the original filing.**

9
10 **c.) If a future separate work order is to be submitted for LED street lights, how is NSPI**
11 **proposing to reconcile two different board proceedings?**

12
13 **Response IR-22:**

14
15 (a) NS Power will seek approval of the capital project with a capital work order application
16 as is done with all capital items of this magnitude. This will occur subsequent to the
17 issuance of regulations.

18
19 (b) NS Power has not applied to establish fees or charges relating to stranded costs in this
20 Application. A capital work order application is the appropriate proceeding to establish
21 such fees or charges. NS Power has provided information supporting the regulated asset
22 included in rate base.

23
24 (c) The Board retains jurisdiction at all times to make changes to prior decisions in light of
25 new or changed circumstances, particularly in respect to rates and charges. If the Board
26 were to decide to use this Application to set the fees or charges for stranded non-LED
27 streetlights, it could change those fees or charges at a future date, including as a result of
28 the better information that will be available when the capital work order is filed. Further,
29 in a future general rate application the Board will be able to change the rates or charges

NON-CONFIDENTIAL

1 that are established in the capital work order proceeding, based upon new information
2 that may be available about, for example, items such as actual costs and experience with
3 the program. As such, there will be no need for reconciliation of different Board
4 proceedings.

NON-CONFIDENTIAL

1 **Request IR-23:**

2

3 **a.) Which municipalities have already converted 100% LED street**
4 **lights?**

5

6 **b.) For each of these municipalities, please provide the fixture count before (with HPSs)**
7 **and after (with LEDs) the conversion.**

8

9 Response IR-23:

10

11 (a-b) NS Power is aware of the following municipalities converting all NS Power owned, non-
12 LED street lights.

13

Municipality	Before Conversion	After Conversion
Amherst	1,100	1,100
Chester	200	200
East Hants	1702	1694
New Glasgow	1208	1219
Oxford	238	219
Annapolis Royal	133	133

14

NON-CONFIDENTIAL

1 **Request IR-24:**

2
3 **Please provide a summary total for all 70 and 100 watt high pressure sodium streetlights**
4 **owned and maintained by NSPI. Include a breakdown of the number of fixtures, average**
5 **age and capital, as well as maintenance and energy costs currently billed to customers.**

6
7 Response IR-24:

8
9 NS Power is unable to provide the average age of its streetlights by type as this is a pooled asset.
10 That is, all fixtures have been accounted for together and depreciated an aggregated rate that
11 represents the average life of the group. Based on information used in unmetered studies,
12 included in Attachment 3 of Appendix P of the Application, the summary for 70 and 100 watt
13 high pressure sodium streetlights is as follows.

14
15 2013 Streetlight Information:

16

Fixture Type	Fixture Count (Year Average)	Energy Revenue (\$)	Maintenance Revenue (\$)	Capital Revenue (\$)
70W HPS				
Full Charge	33,496	1,820,842	1,622,772	1,164,743
Energy/Maintenance	258	14,025	12,499	N/A
Energy Only	5,978	324,964	N/A	N/A
100W HPS				
Full Charge	40,402	3,083,476	1,957,343	1,416,017
Energy/Maintenance	135	10,303	6,540	
Energy Only	2,377	181,413		

2013 General Rate Application (NSUARB P-893)
NSPI Responses to Halifax Regional Municipality Information Requests

NON-CONFIDENTIAL

1 2014 Streetlight Information:

2

Fixture Type	Fixture Count (Year Average)	Energy Revenue (\$)	Maintenance Revenue (\$)	Capital Revenue (\$)

3

NON-CONFIDENTIAL

1 **Request IR-25:**

2

3 **a.) Please provide the current depreciation rate for street lighting fixtures and the date**
4 **the current rate became effective.**

5

6 **b.) Please provide a year-by-year history of prior depreciation rates for street lighting**
7 **fixtures beginning in 1973 or such year as NSPI has this information and the effective date**
8 **of each rate change in the depreciation rate.**

9

10 **Response IR-25:**

11

12 (a) The current depreciation rate for streetlights is 5.33 percent. This rate became effective
13 January 1, 2012.

14

15 (b) Please refer to the figure below for streetlight depreciation rates. NS Power was able to
16 track this information back to 1996.

17

Year	Depreciation Rate (%)	Effective Date for Rates
1996-2003	4.21	1996
2004-2005	4.32	2005
2006-2008	4.44	2006
2009-2011	4.55	2009
2012 forward	5.33	2012

18

NON-CONFIDENTIAL

1 **Request IR-26:**

2
3 **Please provide a history of NSPI's Board-approved Pre-Tax and Tax-Adjusted Weighted**
4 **Average Cost of Capital for each year over the last 20 years or from the time such data is**
5 **available.**

6
7 Response IR-26:

8
9 Please see figure below for the information that is available.

10

Year	Pre-Tax WACC (%)	Tax-Adjusted WACC (%)
2003	8.92	7.08
2004	8.65	7.01
2005	8.30	6.65
2006	8.21	6.61
2007	8.25	6.66
2008	7.91	6.38
2009	8.23	6.72
2010	7.96	6.55
2011	7.87	6.68
2012	7.97	6.67

11 Note: Weighted Average Cost of Capital (WACC)

12
13 WACC is reviewed each year during the Annual Capital Expenditure processes. These amounts
14 are not necessarily included in each year's rates as a general rate application was not filed each
15 year.

NON-CONFIDENTIAL

NON-CONFIDENTIAL

1 **Request IR-29:**

2

3 **a.) Please provide a survivor curve for existing HPS 100W fixture.**

4

5 **b.) Please provide a survivor curve for existing HPS 100W lamp.**

6

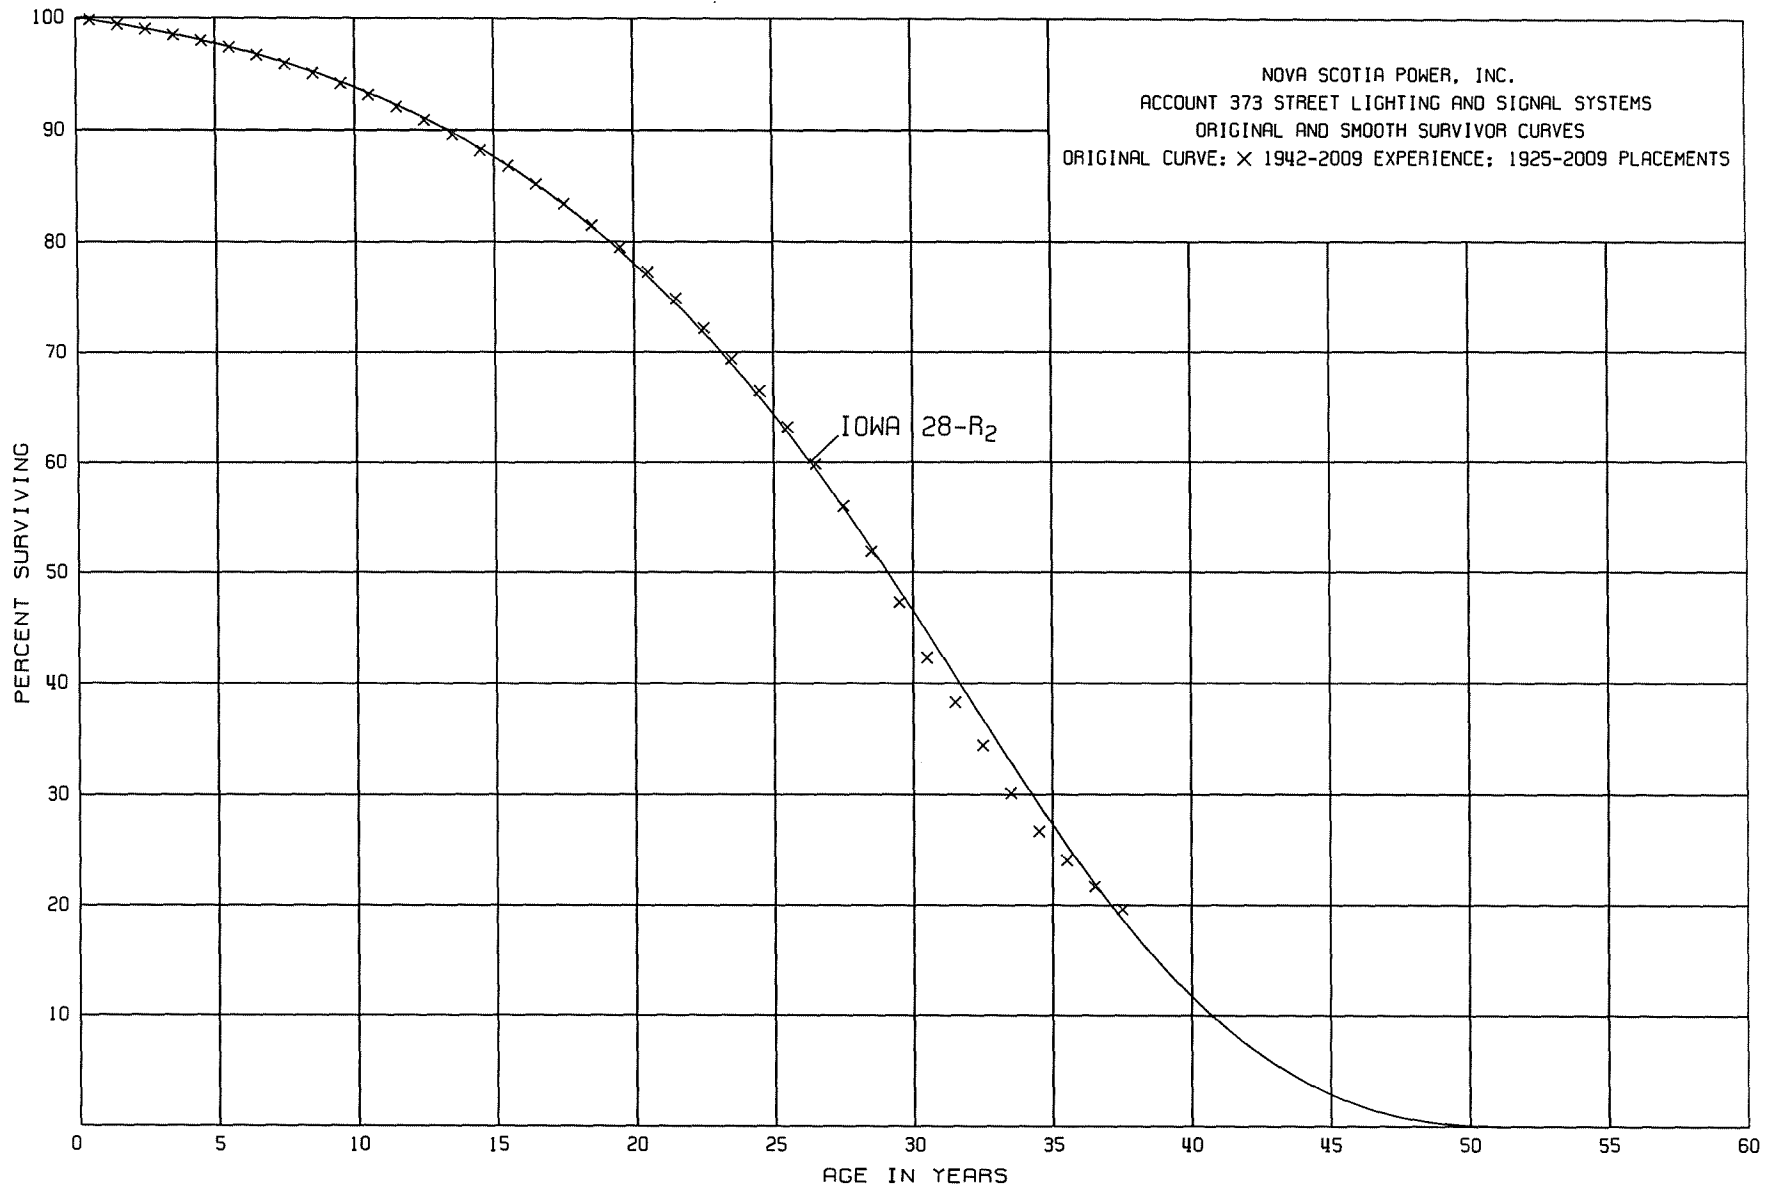

7 Response IR-29:

8

9 (a-b) NS Power does not have separate survivor curves for the different components of
10 streetlights. Please refer to Attachment 1 for the streetlight survivor curve used in the
11 2010 Depreciation Study.¹

¹ NSPI 2010 Depreciation Study, Evidence, NSUARB-NSPI-P-891, October 29, 2010, Appendix A, page 111 of 229.

A-53

NON-CONFIDENTIAL

1 **Request IR-30:**

2

3 **When a non-LED streetlight is retired from plant, please describe the associated plant and**
4 **depreciation reserve entries that are made.**

5

6 Response IR-30:

7

8 Please refer to Attachment 1 for a copy of NS Power's Board approved Accounting Policy 6420
9 Retirement and Disposal of Capital Assets.

10

11 As stated in Section 09:

12

13 For retirements of property, plant and equipment other than land, the original cost
14 plus any costs of removal less salvage proceeds is charged to accumulated
15 depreciation, with no immediate gain or loss recognized.

16

17 As an example, for a sample retirement of \$100 worth of streetlights the entry would be as
18 follows:

19

20	DR	Accumulated Depreciation – Streetlight	\$100
21	CR	PP&E Asset – Streetlight	\$100

22

23 This entry removes the cost of the streetlight from the asset pool and the accumulated
24 depreciation group.

PROPERTY, PLANT AND EQUIPMENT
**RETIREMENT AND DISPOSAL
 OF CAPITAL ASSETS - 6420**

DEFINITIONS

01 Cost

Cost is the main component of most **retirement work orders**. Refer to NSPI's Accounting Policy & Procedures Manual 6100 for a more detailed description of the items included in cost. The amounts that must be removed to record the deletion of an asset from service includes its cost and related accumulated depreciation.

02 Asset Retirement Obligations ("AROs")

An asset retirement obligation is an obligation associated with the retirement of a tangible long-lived asset.¹ These costs include but are not limited to labour, materials, overhead and vehicle expenses.

03 Removal Costs

Removal costs refer to the charges associated with removing a retired asset from its in-service location. These costs include but are not limited to labour, materials, overhead and vehicle expenses.

04 Salvage Value

Salvage value refers to the proceeds from the sale of a retired asset or, if a retired asset is returned to inventory, the inventory value at which it is recorded.

05 Net Salvage Value

Salvage value less cost of removal is referred to as net salvage value. The amount may be either positive or negative and is charged or credited to accumulated depreciation.

06 Retirement Work Order

Retirement costs can be recorded in a retirement work order or in a new capital work order. Retirement work orders are used to collect all retirement costs and salvage values associated with a retirement project. They are subject to the same approval process as **new capital work orders**. Within new capital work orders, retirement, salvage and original cost amounts are captured under retirement accounts.

¹ FASB ASC 410-20-20

PROPERTY, PLANT AND EQUIPMENT
**RETIREMENT AND DISPOSAL
 OF CAPITAL ASSETS - 6420**

GENERAL

- 07 Plant in service refers only to assets that are currently used and useful in the provision of electric service to the consuming public or assets that are not used but are useful for standby purposes or future services. Factors causing assets to lose their ability to provide service include:
- a. reaching the end of their useful lives;
 - b. irreparable equipment failure; and
 - c. technological obsolescence.

POLICY

- 08 Assets that are not used and not expected to be used in the foreseeable future should be retired from plant in service.²

PROCEDURES

- 09 For retirements of property, plant and equipment other than land, the original cost plus any costs of removal less salvage proceeds is charged to accumulated depreciation, with no immediate gain or loss recognized.
- 10 A retirement work order must be submitted for any proposed significant capital asset retirement and it must follow the same approval procedures as new Capital Work Orders. These are used to remove costs from the capital asset records. For new capital work orders that have a retirement component, the work order will be set up and approved with retirement accounts to capture the cost of retiring assets, the original cost of the asset to retire and any salvage received from the sale or amount recorded if the asset was returned to inventory. NSPI's Accounting Policy & Procedures Manual Section 6200 explains the procedures for approval of new Capital Work Orders.
- 11 When retired assets are physically removed from their in-service locations and subsequently sold or returned to inventory, costs of removal along with any proceeds of disposal are accumulated in the proper accounts within a capital work order.
- 12 In the event that salvage is in the form of proceeds from an insurance claim, the work order is credited with the total claim (including the deductible) while the deductible amount only is charged to operations.

²Please refer to NSPI's Accounting Policy & Procedures Manual Section 6350 for a discussion of the classification of assets.

PROPERTY, PLANT AND EQUIPMENT
**RETIREMENT AND DISPOSAL
OF CAPITAL ASSETS - 6420**

-
- 13 When a work order has received final cost approval, an entry is made for the final disposition of charges to capital assets in service and accumulated depreciation.

Retirement of Assets Other than Land

- 14 When assets are disposed of, a retirement work order is set up or retirement accounts are set up within a capital work order.
- 15 Asset retirement obligations have been set up for the decommissioning of applicable assets³ consistent with *FASB ASC 410-20 Asset Retirement and Environmental Obligations, Asset Retirement Obligations*. The obligation is determined consistent with FASB ASC 410-20-30, *Asset Retirement and Environmental Obligations, Asset Retirement Obligations, Initial Measurement*. The obligation is revised as required under the FASB ASC 410-20-35 *Asset Retirement and Environmental Obligations, Asset Retirement Obligations, Subsequent Measurement*.

Retirement of Land

- 16 When land is disposed of, retirement accounts within a work order are used to remove its cost from the capital asset records.
- 17 If the proceeds from the sale of land are greater than the cost of the land plus the retirement costs than a gain on the sale must be recognized. Consequently, if the proceeds are less than a loss on the sale must be recorded.

³Please refer to NSPI's Accounting Policy & Procedures Manual 6320 for a discussion of the Asset Retirement Obligations.

NON-CONFIDENTIAL

1 **Request IR-31:**

2

3 **According to NSPI's current net book value of existing unmetered street lights, what is the**
4 **average age; at what date?**

5

6 Response IR-31:

7

8 NS Power does not track this information in the asset management system.

NON-CONFIDENTIAL

1 **Request IR-32:**

2

3 **Please describe and provide copies of the instructions given to field and accounting staff to**
4 **distinguish between street lighting operating expenses and street lighting capital expenses.**

5

6 Response IR-32:

7

8 The costs of adding or replacing street lights are accounted for as capital expenditures. The cost
9 of activities that serve to maintain street lights, or to replace shorter-lived items such as the lamp,
10 ballast or photo cells, are not capitalized but rather are recognized as an operating expense.
11 Please refer to Attachment 1 for the copy of a presentation made to field accounting staff
12 describing the accounting treatment of street light operating versus capital expenses; please note
13 that the project codes for routines used in this presentation have since changed, but the
14 accounting treatment remains the same.

An Expenditure is Capital When...

- New assets are added to the system which have a life span of more than one year.
- An asset is replaced with another, 'in kind' or with a different unit (retirement and installation).
- A previously capitalized asset is removed from service (retirements).
- The lifespan of an existing asset is extended by more than one year (betterment).
- The functionality or cost of operation of an asset is improved (betterment).
- All of the above are subject to materiality limits.

Materiality defined...

- Materiality addresses the value or potential impact on the bottom line, of a decision.
- Threshold values are defined depending on the type of system in which the asset is being installed.
 - **Transmission - \$5000**
 - **Distribution - \$1000**
 - **Tools - \$1000**
 - **Buildings - \$2000**
 - **Transportation Equipment - \$2000**
- Materiality is applied or considered after the expenditure has been determined to be capitalizable.
- These limits will be more rigorously applied in the future.

D016 New Customers Unmetered Services

- D016 Qualifying Work
 - This item is for the addition of assets to the system as required to connect new unmetered customers.
 - Street lights are charged here only when they are additions.
 - All other new plant required to connect a new unmetered customer must be included. (Service poles, wire, transformers.)

System Related Operating Costs

1-001-**XXX**-722-0000

or

1-002-**XXX**-722-0000

XXX:

- **050 - Maintenance of Street Lights:** (repair **NOT** replace)
Includes the cost incurred in the maintenance of the street & highway lighting systems. Lamps, photo cells and ballasts are charged here.
- **052 - Service Repairs:** Includes the maintenance of overhead conductors leading from the point where the wires leave the last pole to the point where it is connected to the customer's service entrance (between the pole and the house).
- **116 - Misc Revenue:** Used in conjunction with 0899 **NOT** 0000. Includes all costs related to customer contributed non-capital work (cover-ups, Vehicle accident repair work, etc.).

NON-CONFIDENTIAL

1 **Request IR-33:**

2

3 **Please describe the corresponding plant and depreciation reserve entries NSPI proposes to**
4 **make to its books when a non-LED street lighting fixture is retired. Where is this shown in**
5 **the filing?**

6

7 Response IR-33:

8

9 Please refer to HRM IR-30 for details on retiring a non-LED street light. This information is
10 included in NS Power's test year. Please refer to Multeese IR-22 for details of these amounts
11 and line 13 of RB-02-RB-16 of the Application.

NON-CONFIDENTIAL

1 **Request IR-34:**

2

3 **At what date does NSPI propose to stop accruing depreciation expense on non-LED**
4 **fixtures?**

5

6 Response IR-34:

7

8 NS Power will record depreciation expense on non-LED streetlights while they remain
9 in-service. Once an asset is retired, depreciation stops on the asset. NS Power would also stop
10 recording depreciation expense if the asset was sold as of the sale date.

NON-CONFIDENTIAL

1 **Request IR-35:**

2

3 **Has NSPI investigated the treatment accorded conversion to LED street lighting in other**
4 **jurisdictions insofar as: (a) stranded assets; and (b) below-the-line treatment are**
5 **concerned? Please provide a summary of LED conversions in other jurisdictions as noted**
6 **above.**

7

8 Response IR-35:

9

10 No.

NON-CONFIDENTIAL

1 **Request IR-36:**

2

3 **Since the NSPI 2012 GRA and the signing of the Settlement Agreement, has NSPI installed**
4 **any non-LED street lights? Why?**

5

6 Response IR-36:

7

8 Yes. Please refer to HRM IR-4 for the quantities. NS Power committed during the 2012 ACE
9 proceeding not to proceed before there were regulations in place requires the replacement of non-
10 LEDs.¹
